

Workshop on smart mitigation of GHG emissions from livestock production.

Examples of joint research calls

20-21 February 2018, Dublin

- **Niels Götke**
 - Danish Agency for Science and Higher Education
 - Coordinator of ICT-AGRI ERA-NET

ict-agri.eu

Two cases

Case 1: 2014 Applications for smart agriculture (with SmartAgriFood)

Case 2: 2016 COFASP and MBT

Case 1. ICT-AGRI and SmartAgriFood2

SmartAgriFood2: a FI-PPP project supporting SMEs in the development of smart services and applications for the agri-food sector.

Why working together? common interests (SME's), in line with ICT-AGRI SRA

How was contact made? Invitation by DG CNCT to a Future Internet PPP meeting, joint workshop, personal contacts

Case 1. ICT-AGRI and SmartAgriFood2

- MoU and common Guidelines
- Use of ICT-AGRI MKB as Electronic Submission System
- Use of FI-ware and FI-space
- 4MEUR from SAF2 and 0,75MEUR from ICT-AGRI
- **Lessons learnt:** Not more complicated than a normal ERA-NET call

Case 2. COFASP and MBT 2016 common call

Overarching theme: marine biotechnology as an enabling technology to solve challenges within fisheries, aquaculture and seafood processing.

Topics

1. Fisheries stock assessment and dynamic modelling
2. Aquaculture
3. Explore opportunities for the use of enzymes to develop more efficient seafood processing methods and high value products

1. COFASP ERA-NET?

Cooperation in Fisheries, Aquaculture and Seafood

The objectives of COFASP is to strengthen cooperation and synergies between major European funding agencies that support research on sustainable exploitation of marine renewable resources.

MarineBiotech

MBT- ERA-NET: Marine Biotechnology

Marine Biotechnology ERA-NET (ERA-MBT) is funded under the European Commission's Seventh Framework Programme. Grant Agreement Number 604814

December 2013 - November 2017

Lessons learnt: Joint Call COFASP-MBT

Why: Common interests, very good contacts between partners in COFASP and MBT, looking forward in H2020 and paving the wave for a new cofund ERA-NET in 2019, building ERA, stakeholder and industry wish, both ERA-NETs linked to JPI-OCEANs

Difficulties: commitment from funders in MS and AC (the call was an additional call)

Today: COFASP and MBT have merged into **BlueBio**

Conclusion (joint calls between ERA-NETs and other partnering initiatives)

If you share common visions and if you have the necessary resources.

Just do it !

Workshop on smart mitigation of GHG emissions from livestock production.

20-21 February 2018 *Dublin*

Thank you for your attention

Niels Gøtke
